

Improvement 1

Improvement Number: 1

Improvement Title:

Login via Facebook or Google

Improvements Description:

Allow the user to log in via Facebook or Google without registering.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"
2. Click on Login button

Actual Result:

User is not able to login via Facebook or Google without registration.

Expected Result:

Make option for user to login via Facebook or Google without registration.

Screenshot/Video:

<https://prnt.sc/q55gjo>

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 2

Improvement Number: 2

Improvement Title:

Only the first word should be in capital letters.

Improvements Description:

Make the field names more readable and only the first word should be in capital letters.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"
2. Click on 'Create an Account' button

Actual Result:

Each word begins with a capital letter.

Expected Result:

The field names are more readable and only the first word is in capital letters.

Screenshot/Video:

<https://prnt.sc/q55pom>

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 3

Improvement Number: 3

Improvement Title:

Error notification messages should be less harsh.

Improvements Description:

When a user performs an incorrect action in the field, error notification messages should be less harsh.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"
2. Click on 'Create an Account' button

Actual Result:

Error message the user is notified contains two exclamation points (!!) and makes it harsh and less user-friendly.

Expected Result:

Error message should be designed to inform user about his mistakes in a good way (for example: "Please enter the last name that is not longer than 100 characters.", "Your password needs to contain both lower and upper case characters, number and a special character.").

Screenshot/Video:

<https://prnt.sc/q58fvc>

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 4

Improvement Number: 4

Improvement Title:

Increase button for step bid.

Improvements Description:

Option for step bid is too small to notice, the button should be increased for easier use.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"
2. Go to 'Feature Collection' and click on first product
3. Click on field 'Enter bid'

Actual Result:

Option for step bid is too small to notice.

Expected Result:

Button should be increased for easier use.

Screenshot/Video:

<https://prnt.sc/q58rle>

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 5

Improvement Number: 5

Improvement Title:

User should be able to open the image and zoom in/out it.

Improvements Description:

Enable option for the user to open the image by clicking on it and make an option to zoom in/out on it.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"
2. Go to 'Feature Collection' and click on first product

Actual Result:

User is unable to open the image.

Expected Result:

User is able to open the image and zoom in/out it.

Screenshot/Video:

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 6

Improvement Number: 6

Improvement Title:

User should be able to switch between images.

Improvements Description:

User should be able to switch between images by click or with keyboard.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"
2. Go to 'Feature Collection' and click on first product

Actual Result:

User is not able to switch between images by click or with keyboard.

Expected Result:

User should be able to switch between images by click or with keyboard.

Screenshot/Video:

<https://prnt.sc/q59qhe>

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 7

Improvement Number: 7

Improvement Title:

In 'Create an Account' add a field for the confirmation password.

Improvements Description:

Add another field in the register for the confirmation password.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"
2. Click on 'Create an Account' button

Actual Result:

There is no field for the confirmation password.

Expected Result:

User should be able to confirm his password.

Screenshot/Video:

<https://prnt.sc/q6j6s7>

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 8

Improvement Number: 8

Improvement Title:

On home page make offered product to be shown by the expiration of time.

Improvements Description:

Offered product on home page should be shown by expiration of time.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"

Actual Result:

The product is shown by random order.

Expected Result:

The product is shown by the expiration of time.

Screenshot/Video:

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 9

Improvement Number: 9

Improvement Title:

User should be able to write amount with either decimal dot or comma.

Improvements Description:

When the user is entering the price, beside comma decimal separator should be dot.

Steps to reproduce:

1. Navigate to "<https://atlantbh-auctionapp.herokuapp.com/home>"
2. Click on offered product on home page

Actual Result:

Only with comma user can enter the price with a decimal value, when entering the dot, numbers before it are being erased.

Expected Result:

On every product, price is written with dot as decimal separator, make an option to enter price with a dot so everything on the page would be consistent.

Screenshot/Video:

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 10

Improvement Number: 10

Improvement Title:

When user does not enter a required field or enters incorrect information on "Profile" page, focus it on that field or form.

Improvements Description:

On "Profile" page when the user does not enter a required field or enters incorrect information and click on the save button, except the error message that is displayed below the box, focus it on that field or form.

Steps to reproduce:

1. Navigate to "<https://auction-webapp.herokuapp.com/shop/products/5/50>"
2. Click on 'My account' button
3. On dropdown menu click "Profile"

Actual Result:

User has to scroll to find where the mistake is.

Expected Result:

User should be focus it on that field or form where mistake is.

Screenshot/Video:

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 11

Improvement Number: 11

Improvement Title:

Make validation for phone number, card number, CVC/CW and zip code that only number can be entered.

Improvements Description:

On "Profile" page in fields phone number, card number, CVC/CW and zip code allow the user to enter numbers only.

Steps to reproduce:

1. Navigate to "<https://auction-webapp.herokuapp.com/shop/products/5/50>"
2. Click on 'My account' button
3. On dropdown menu click "Profile"

Actual Result:

User is able to enter all characters (letters, numbers, special character).

Expected Result:

User should be able to enter only numbers in these fields.

Screenshot/Video:

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 12

Improvement Number: 12

Improvement Title:

In the process of posting the product enable the user to start the auction immediately.

Improvements Description:

When posting the product, in the second step 'SET PRICES' enable the user to choose to start the auction immediately.

Steps to reproduce:

1. Navigate to "<https://auction-webapp.herokuapp.com/shop/products/5/50>"
2. Click on 'My account' button
3. On dropdown menu click "Become seller"

Actual Result:

When user posts a product, the auction starts only after 12h.

Expected Result:

The auction should start immediately after user posts the product on his profile.

Screenshot/Video:

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1

Improvement 13

Improvement Number: 13

Improvement Title:

Make an additional explanation on the popup message when the user wants to deactivate.

Improvements Description:

Make the additional explanation when deactivating the account, to inform the user that the account is being permanently deleted and that the email address cannot be used for another registration or login.

Steps to reproduce:

1. Navigate to "<https://auction-webapp.herokuapp.com/shop/products/5/50>"
2. Click on 'My account' button
3. On dropdown menu click "Settings"
4. Click on "Deactivate" button

Actual Result:

User is not informed that the email address cannot be used for another registration or login after deactivation.

Expected Result:

User should be informed with the additional message, e.g. "Are you sure you want to deactivate your account? After this you won't be able to register or login via this email address."

Screenshot/Video:

<https://prnt.sc/qfc7q3>

Environment:

Google Chrome version 78.0.3904.108
OS: macOS Catalina version 10.15.1

Improvement 14

Improvement Number: 14

Improvement Title:

In the process of posting the product prevent choosing previous dates.

Improvements Description:

In the process of posting the product, in the second step 'SET PRICES', make previous dates disabled.

Steps to reproduce:

1. Navigate to "<https://auction-webapp.herokuapp.com/shop/products/5/50>"
2. Click on 'My account' button
3. On dropdown menu click "Become seller"

Actual Result:

Previous dates can be selected, but the error will appear.

Expected Result:

Make previous dates frozen or crossed so that they cannot be chosen.

Screenshot/Video:

<https://prnt.sc/qfc5pz>

Environment:

Google Chrome version 78.0.3904.108

OS: macOS Catalina version 10.15.1
